

November 9, 2023

Dear Sir or Madam,

I am writing to recommend Beile Zhang for admission to your postgraduate programme. Beile was in my Image Processing (as part of the Data Science module) and Systems Programming (as part of the Programming Paradigms module) classes in 2022/2023 and is currently taking my Deep Learning module in 2023/2024.

Beile has demonstrated great talent and diligence in all three modules and has shown incredible flexibility, overall competence in various areas of programming and great analytical skills that are of utmost importance for any higher degree. Furthermore, Beile is highly driven, enthusiastic and organised, which would make for an ideal candidate for an advanced degree in computing.

Beile received a first class mark in the Systems Programming module, focusing on a large multifaceted C project, which demonstrates great aptitude in programming. As part of my Image Processing coursework, students were required to solve a complicated image enhancement problem using existing and novel methods, which would often encourage carrying out a small research project within the area, which Beile undertook successfully.

Beile has a positive attitude and can ambitiously accomplish goals with great initiative. It is therefore my great pleasure to recommend Beile Zhang to you. If you have any further questions with regard to Beile's background or qualifications, please do not hesitate to contact me.

Yours faithfully,

Dr. Amir Atapour-Abarghouei
Assistant Professor, Machine Learning & Computer Vision
Department of Computer Science, Durham University,
Durham, DH1 3LE, UK.
