

BEILE ZHANG

MSc Computer Science Student

✉ cheunggrr@icloud.com 📞 +61 411671776 🌐 [Portfolio](#)

Summary

- Daily AI-assisted development across frontend (Cursor) and backend (Claude Code CLI).
- Structured workflow: AI analyzes codebases → documentation drafting → human review → requirement generation → model cross-check.
- Deployed a self-hosted OpenClaw AI agent on an AWS Ubuntu instance; integrated LLM providers and built Python automation scripts.

Education

University of Sydney

Master of Computer Science (Advanced Entry)

Sydney, Australia

Feb 2026 – Feb 2028 (Expected)

Durham University

Bachelor of Computer Science

Durham, UK

Sep 2021 – Jun 2024

Projects

AI-Augmented Development Pipeline

2024 – Present

- Integrated AI coding tools (Cursor, Claude Code CLI) into daily development workflows.
- Used GPT and Codex APIs for automation workflows and rapid prototyping.
- Workflow: AI analyzes codebases and drafts documentation → human review → requirement list → model cross-check.
- Deployed OpenClaw on AWS Ubuntu; wrote Python scripts for automation.

Experience

Full-stack Development & IT Consulting

Southeast Asia – Remote

Full-stack Developer & IT Consultant

Aug 2024 – Jan 2026

- Built PHP/Vue/MySQL web projects end-to-end.
- Deployed and maintained production systems; scoped requirements with clients.
- Used Cursor and ChatGPT to accelerate coding, debugging, and documentation workflows.

Cross-border E-commerce

Vietnam – Remote

Full-stack Developer

Mar 2021 – Nov 2021

- Built and maintained an e-commerce platform for international retail.
- Managed backend + DB for orders and products.
- Analyzed user data for SEA marketing.

Tencent “Rocket Project” Programme (Unpaid Intern)

Remote

Technical Intern

Jun 2021 – Aug 2021

- Built microservice components for scalable architecture.
- Implemented login flows and DB search.
- Tuned multi-level caching for performance.

Technical Skills

AI Tools & Automation: Cursor, Claude Code CLI, ChatGPT, Codex, Python scripting, multi-agent review

Programming: Python, JavaScript, TypeScript, C, PHP

Backend & Database: Node.js, MySQL, Redis, Nginx

Frontend: Vue, React Native, UniApp

Tools: Git, Postman, Figma, AWS (basic), Adobe Photoshop
